

If Statements

The diagram illustrates the syntax of an if statement with the following code and annotations:

```
if the_world_is_flat:  
    print("Don't fall off!")
```

- No parentheses needed:** Points to the `if` keyword.
- Colon:** Points to the colon at the end of the condition.
- No curly braces!:** Points to the indentation of the body.
- Use 4 spaces for indentation:** Points to the four spaces before the `print` statement.
