

#Rememberwhere?

float(15.5)

```
int('101001', base=2)
```

str(41)

list('happy')

dict(a=1, b=2)

We've Seen Instantiation Before

Remember these?

```
float('3.5')
```

```
int('101001', base=2)
```

```
str(41)
```

```
list('hap.py')
```

```
dict(a=1, b=2)
```

Custom Constructor using `__init__`
