

3

Use **in** Where Possible

```
if d.has_key(key):  
    print("Here!")
```

```
if x == 1 or x == 2 or x == 3:  
    return True
```

```
if 'hello'.find('lo') != -1:  
    print("Found")
```

```
if key in d:  
    print("Here!")
```

```
if x in [1, 2, 3]:  
    return True
```

```
if 'lo' in 'hello':  
    print("Found")
```

4

Swap Two Variables

```
temp = a
```

```
a = b
```

```
b = temp
```

```
a, b = b, a
```
