

def

1

return

return

532 # prints 'Arguments: (5, 3) {'c': 2}'

#enums 16

Using our debug decorator

`@debug`

```
def foo(a, b, c=1):  
    return (a + b) * c
```

@decorator applies a decorator
to the following function

```
foo(5, 3, c=2) # prints "Arguments: (5, 3) {'c': 2}"  
# => returns 16
```

Other Uses of Decorators
