

# General Good Practices

**Spacing** Use 4 spaces to indent. Don't use tabs.

Use blank lines to separate functions and logical sections inside functions.

Use spaces around operators and after commas, but not directly inside delimiters

```
a = f(1, 2) + g(3, 4)
```

**Commenting** Comment all nontrivial functions.

Add header comments at the top of files before any imports.

If possible, put comments on a line of their own.
