

elif and else

```
if some_condition:  
    print("Some condition holds")  
elif other_condition:  
    print("Other condition holds")  
else:  
    print("Neither condition holds")
```

zero or more `elif`s

`else` is optional

Python has no `switch` statement,
opting for `if/elif/else` chains

Palindrome?

Spelled the same
backwards and forwards
