

"Building Graphical Applications"

Python clients wrapped around backend graphics systems

Tk (and Python's tkinter)

Qt5 (and Python's PyQt5)

GTK (and Python's PyGTK)

wxWidgets (and Python's wxPython)

User-friendlier wrappers around these (e.g. graphics.py)

Our campy library makes GOvals, GRects, etc. available!

"Surprising Random Facts and Stories about Python"
