

An Example

Bad Python

Good Python

1

Boolean Zen

```
if x == True:
    print("Yes")

if len(items) > 0:
    print("Nonempty")

if items != []:
    print("Nonempty")

if x != None:
    print("Something")
```

```
if x:
    print("Yes")

if items:
    print("Nonempty")

if items:
    print("Nonempty")

if x is not None:
    print("Something")
```
