

# Lazy Generation

```
def fibs_under(n):  
    for fib in generate_fibs():    # Loops over 1, 1, 2, ...  
        if fib > n:  
            break  
        print(fib)
```

# Why Use Iterators and Generators?
