Python & the Web, Continued

May 4, 2021

Other Changes

Other Changes

- People seem a bit split on Ed workspaces; some say they can be confusing to use but others think they're designed well...
 - The Github session yesterday provides an alternative for assignments!
 - We'll try to better flag how you can do activities on your computer instead— generally, feel free to download the files from the workspace, share your screen, and do the activity that way.

Other Changes

- People seem a bit split on Ed workspaces; some say they can be confusing to use but others think they're designed well...
 - The Github session yesterday provides an alternative for assignments!
 - We'll try to better flag how you can do activities on your computer instead—generally, feel free to download the files from the workspace, share your screen, and do the activity that way.
- People generally seem to like our labs but...
 - ...one person doesn't like Saturn—you can download the file as a Jupiter notebook! Download and change the extension to `.ipynb`
 - ...one person thinks the questions can be vague—sometimes that's intentional, sometimes it's meant for TAs to guide the problem, but we'll try to make them more specific!

Learning Goals for this Lecture

After today, you'll be able to...

1. Build an API that's locally hosted in Flask.
2. Deploy that API online.
