'Fido'

'Buddy'

'roll over'

'come here'

```
          # => ['roll over', 'come here'] (shared value)
```

Hmm...

```python
d = Dog('Fido')
e = Dog('Buddy')
d.teach_trick('roll over')
e.teach_trick('come here')
d.tricks  # => ['roll over', 'come here'] (shared value)
```

Solution
