`4` `# => True`

```
"Hello"                    # => True
```

```
    None                    # => True
```

`1 2 3` `# => True`

```
                                          # => True
```

Everything is an Object

```python
isinstance(4, object)        # => True

isinstance("Hello", object)  # => True

isinstance(None, object)     # => True

isinstance([1,2,3], object)  # => True

isinstance(str, object)      # => True
```

Objects have Identity
