'Hello'

```
"wørld"   # Unicode by default
```

```
greeting + ' ' + group + "!"  # => 'Hello wørld!'
```

Strings

No **char** in Python!

Both ' and " create string literals

```python
greeting = 'Hello'

group = "wørld"   # Unicode by default

greeting + ' ' + group + "!" # => 'Hello wørld!'
```

Indexing

$$s = \text{'Arthur'}$$
