Use _ for ignored variables

```python
for i in range(10):

    x = input("> ")

    print(x[::-1])
```

```python
for _ in range(10):

    x = input("> ")

    print(x[::-1])
```

Mutable Default Parameters

```python
def foo(n, x=[]):
    x.append(n)
    print(x)

foo(1, [4])  # => [4, 1]
foo(3)  # => [3]
foo(3)  # => [3, 3]
foo(3)  # => [3, 3, 3]
```

```python
def foo(n, x=None):
    if x is None:
        x = []
    x.append(n)
    print(x)

foo(1, [4])  # => [4, 1]
foo(3)  # => [3]
foo(3)  # => [3]
foo(3)  # => [3]
```
