Can you guess the context of this code?

170 0.1 0.6

```
if        1          0.5
```

```
print "Whew, that is bright!"
```

`if     2       0.5`

```
print "Wow, that is light!"
```

collections.namedtuple

```python
# Can you guess the context of this code?

p = (170, 0.1, 0.6)
if p[1] >= 0.5:
    print("Whew, that is bright!")
if p[2] >= 0.5:
    print("Wow, that is light!")
```

Bad!
